# We go beyond the camera

SPECTS is CIM Pharma's holistic inspection solution that includes a complete software-package for full system integration. SPECTS ensures our clients the right documentation, superior testing, complete validation, and full compliance-readiness to international standards.

Choose an integrated solution

Inspection is at the heart of production in the pharma industry, and inspection solutions must be able to integrate with a variety of systems to deliver optimal performance. SPECTS works with any pre-existing system and can be configured to meet any project specific inspection requirements.
